

Assignment 7

Due: *By Lecture*, Wednesday, February 8
Post as a lab pair.

In your report for Lab 2, you will need to incorporate copolymerization data from the entire class. To facilitate this, *as a lab pair*, post the values for F_1 that you calculated for each f_1 sample analyzed by NMR on the course WebCT Discussion Board. Your Discussion Board message should include your “pair number” and both your names for reference.

There is no need to turn in this assignment; your web post will be graded directly.
